-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1774

Applicant's election without traverse of claims 1-9 in the reply filed on 7-22-05 is acknowledged.

2

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 4, the phrase "ligneous material" is not understood. What makes any material ligneous?

3

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richards et al(US 6306317 B1).

The cited reference teaches the basic claimed process including creating water based slurry of boron salts, adhesive material and mixing them together to form a fire retardant material- col 1, lines 50-60; col 9, lines 59-67; col 11, lines 58-65. It is submitted the mixtures would be independently added together, during the cited patent's process ,in

Art Unit: 1774

the absence of unexpected results. Concerning claims 2,6-9, it is submitted the formed product, including its density, strength, w/w characteristics and compliance, i.e., types material used, are limitations directed to article limitations and are of no patentable consequences to the instant question for patentability which must be manipulatively distinct. It is submitted, however, such product properties would have been obvious if not taught and in the absence of unexpected results. Concerning claim 3, the reference teaches adding numerous material in its mixtures during the patented process- see above. The reference teaches ph manipulations- col 3, lines 29-45. as required by claim 4. It is submitted the boron particle sizes would inevitably decrease during their suspension in the aqueous universal solvent, water . This would be expected as required by claim 5.

5

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Metzner et al(US 4935457) and Richards et al(US 6517748) are cited of interest for their respective teachings and additionally to show the state of the art.

6

Applicants who wish to send a facsimile (draft copies) for the examiner's immediate review can do so by using the Examiner's personal fax number at 571-273-1520. The faxing of all papers must conform with the notice published in the Official Gazette, 1096 O.G. 30 (November 15, 1989). **NOTE: All facsimiles sent to the examiner's**
